I. What is Smart Pool

Nexty's unique Smart Pool is a new mechanism allowing users to share the investment on Nexty-based projects (using NTY for capital mobilization), and earn rewards by percentage in return. Hence, golden investment opportunities are now available for all Nexty supporters of all economic ability, ensuring the equality at its best for all investors in Nexty ecosystem.

In each smart pool program, owners will set the "soft cap" with corresponding reward percentages.

E.g: There are 3 levels of "soft cap":

Soft cap 1: 100,000,000 NTY – 10%: When total investment amount in the Pool reaches 100,000,000 NTY; users will be rewarded with the corresponding amount of GOS and 10% that amount of GOS.

Soft cap 2: 400,000,000 NTY – 20%: When total investment amount in the Pool reaches 400,000,000 NTY; users will be rewarded with the corresponding amount of GOS and 20% that amount of GOS.

Soft cap 3: 1,000,000,000 NTY – 30%: When total investment amount in the Pool reaches 1,000,000,000 NTY; users will be rewarded with the corresponding amount of GOS and 30% that amount of GOS.

The program will automatically ends and no longer allow deposit more NTY when (1) investment pool has already reached soft cap 3 or (2) the investment pool has met the due date. Users have to wait until the Owner Finalize program and set up the reward percentage in each unlock withdrawal. When the Owner unlock successfully, users can view the amount of GOS to withdraw and withdraw.

In case of the due date and the total amount of NTY investment fails to reach soft cap 1, users will be returned the amount of NTY they invest. User have to wait until the Owner Finalize program to withdraw this amount (the amount they invest into the Pool)

When the investment amount is (at most) 100 pNTY less than soft cap 3, the program will automatically ends. The amount of investment at that time will be considered Soft cap 3

II. How to use

1. Login

Access to provided URL to open Login page.

Enter private key into Private key text field then click login to login to Smart Pool wallet.

Private key can be get on Nexty mobile app wallet.

2. How to deposit

In each Smart pool program, owner will set the levels of pool and corresponding rewards

E.g: the following Smart pool has 3 levels:

Soft cap 1: 100,000,000 NTY – 10%: When total investment amount in the Pool reaches 1,000,000,000 NTY; users will be rewarded with 10% the deposit amount of NTY.

Soft cap 2: 4,000,000,000 NTY – 20%: When total investment amount in the Pool reaches 4,000,000,000 NTY; users will be rewarded with 20% the deposit amount of NTY.

Hard cap 3: 1,000,000,000 NTY – 30%: When total investment amount in the Pool reaches 1,000,000,000 NTY; users will be rewarded with 30% the deposit amount of NTY.

Total amount: Total amount of NTY deposit in the pool

End date: The due date of depositing NTY into the pool
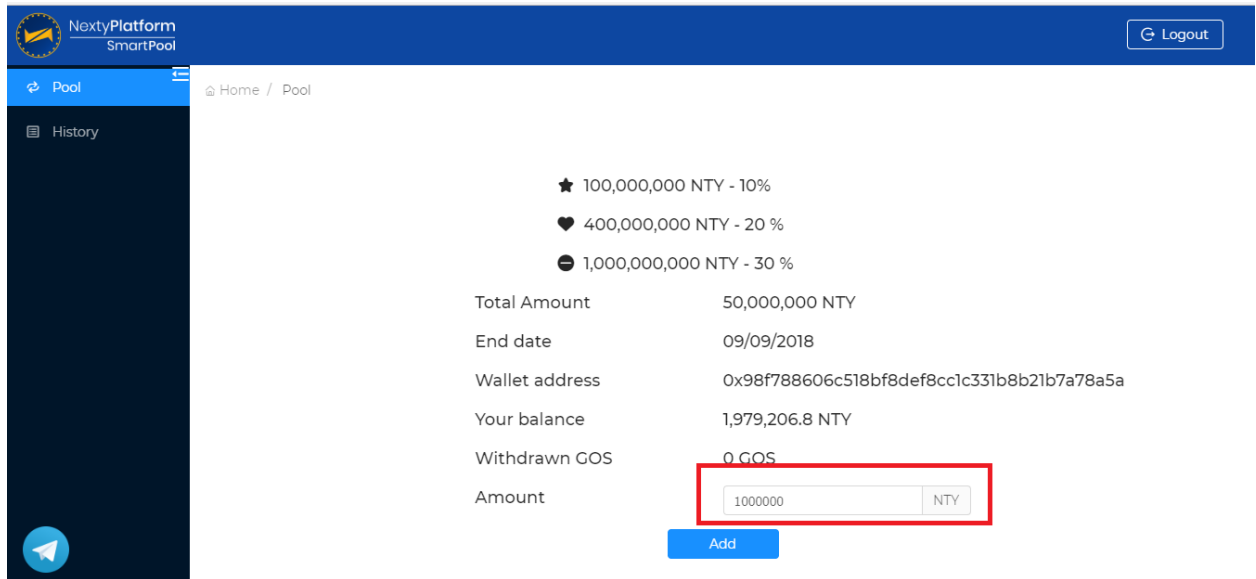

Wallet address: User NTY wallet address

Your balance: Number of NTY in your wallet

**Text field Amount**: Text field for user to enter the amount of NTY deposit into pool.

Button Add: User clicks button "Add" to finally deposit NTY into pool.

Steps:

1. User enters the amount of NTY into text field Amount to deposit.
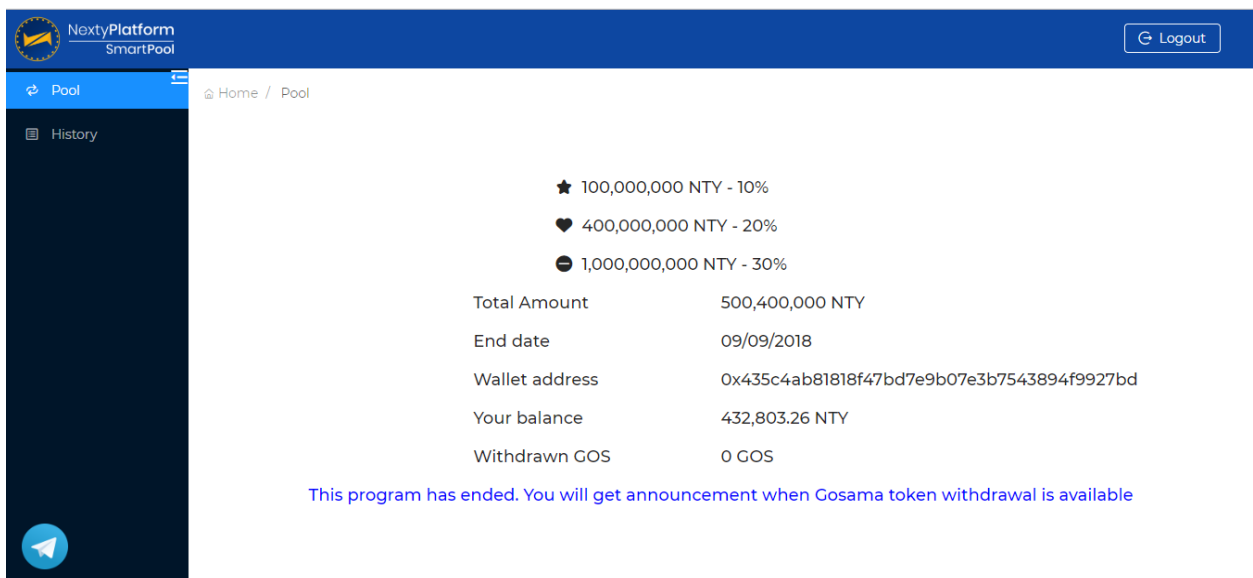

2. User clicks "add" button.

When the screen shows "Deposit successfully", your NTY deposit is successfully sent to the pool.

★ 100,000,000 NTY - 10 %

♥ 400,000,000 NTY - 20%

⊖ 1,000,000,000 NTY - 30%

3. How to withdraw

When it comes to end date or the amount of NTY already reached hardcap threshold, the smart pool will automatically be terminated, users will no longer be able to deposit NTY. Message of the termination will be shown as below

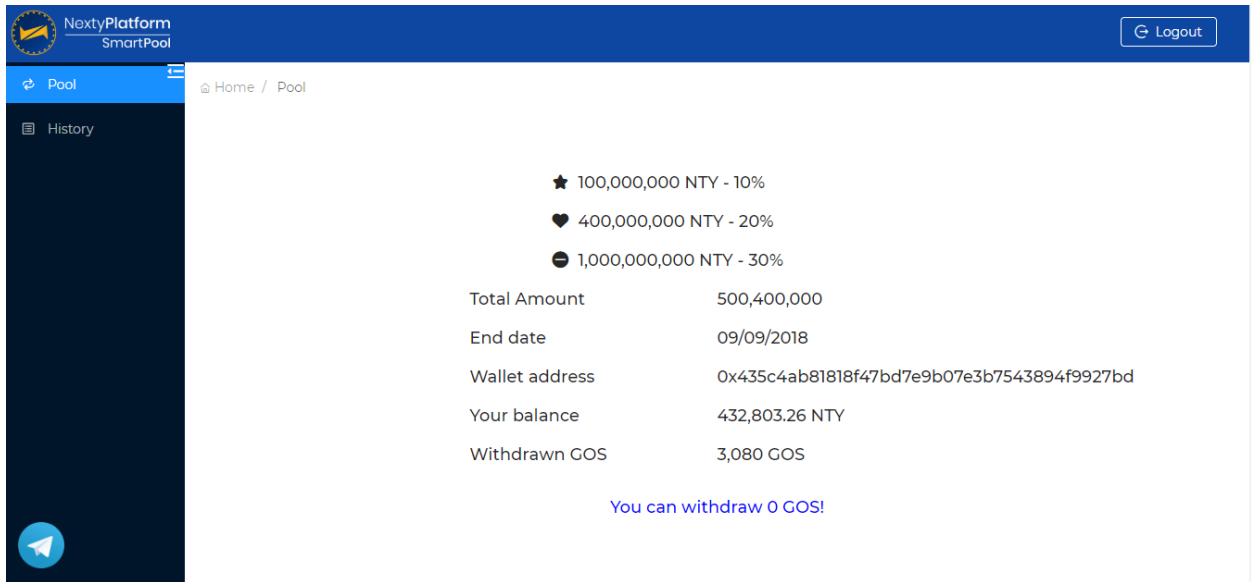

The amount of withdrawn token will be decided by the admin. In case the admin determines the percentage of tokens sold, users will receive a notification of the number of tokens allowed to withdraw (corresponding to which the admin allows).
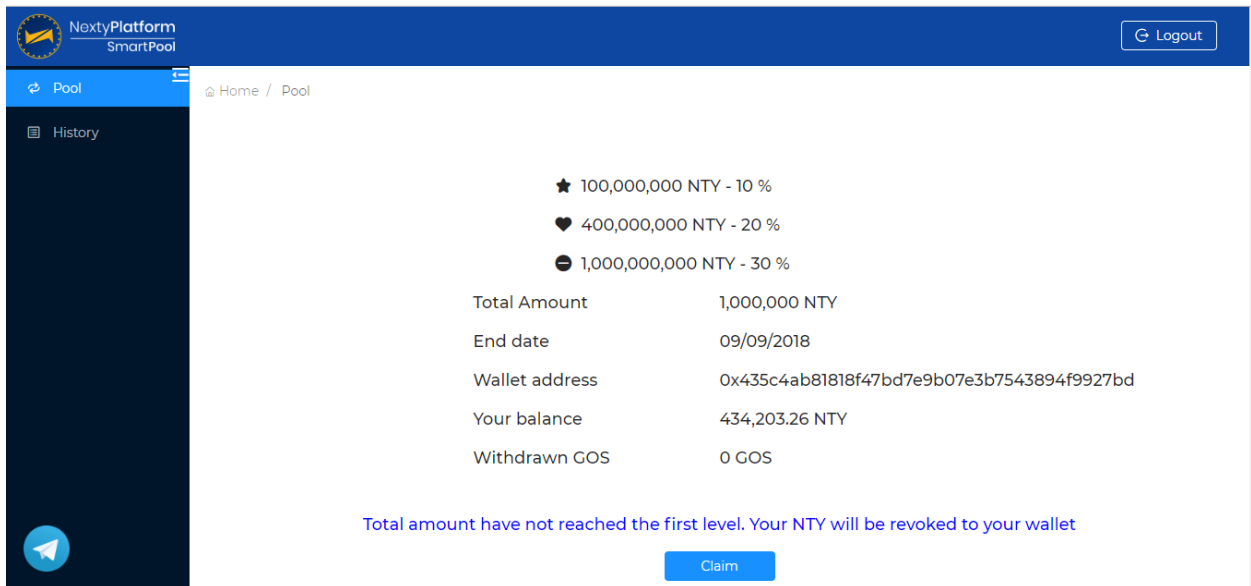

Please click "Claim" button to claim the amount of NTY (that is allowed to withdraw) to withdraw to your wallet. The amount of NTY that is allowed to withdraw will be set "0" until the next withdrawal Unlock.

When the amount of NTY in total fails to reach soft cap, please click "Claim' button to be refunded your NTY.

When the NTY amount reaches level 2, the amount of token users receive will be calculated based on the percentage of softcap

When softcap_2 < NTY amount < hardcap and hardcap- total NTY > the minimum amount, the amount of token users receive will be calculated based on the percentage of softcap 2.
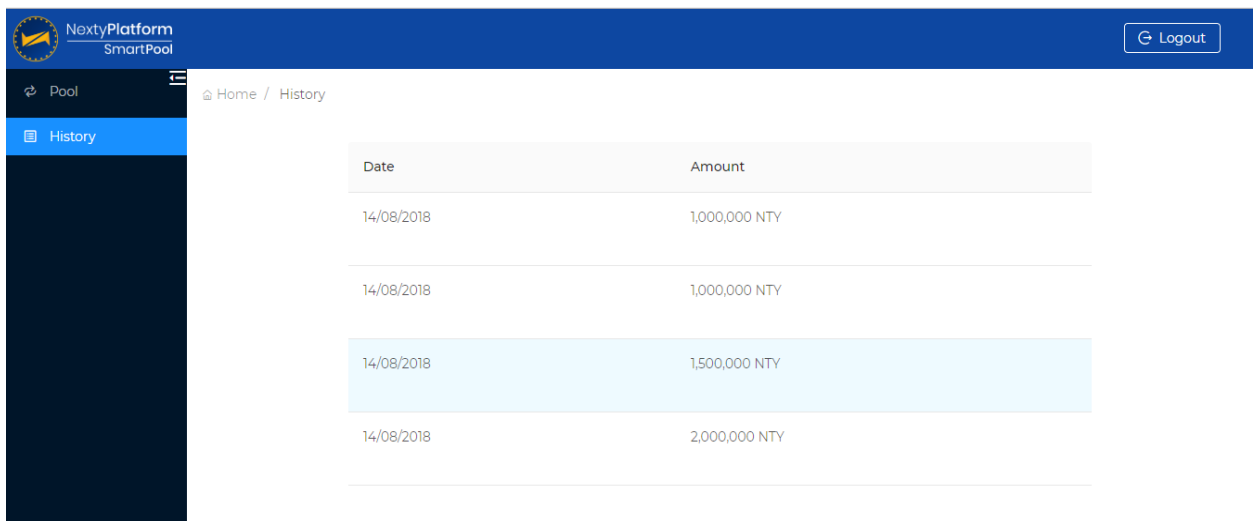

When the NTY amount fails to reach hardcap and hardcap- total NTY < the minimum amount, users will not be able to deposit NTY anymore, the amount of token users receive will be calculated based on the percentage of hardcap threshold.

4. History

Transactions to deposit NTY into pool will be all recorded in the history that displays:

- Send date
- The amount of sent NTY

Access history to view all transaction status

5. Logout

Logout Click to Logout button at the top right of screen to logout from the Smart staking program.
